### Housing Units

Housing By Type	1990 Census Housing Units	1999 Estimated Completed Housing Units	1999 Estimated Occupied Households
Single-family	12,321	13,178	12,954
Multifamily (including town homes)	7,794	9,318	8,716
Mobile Home	4	4	3
<i>Total</i>	20,119*	22,500	21,673

\*This total includes 86 unit(s) listed in "other" housing in the 1990 Census data. The Census defines these units as those not fitting the defined housing categories, such as houseboats, railroad cars, campers and vans. Since no information on "other" units is available between censuses, for purposes of 1999 population and household estimation, these units have been allocated to the single and multiple family categories. This was done based on persons per "other" household and the ratio of single-family to multifamily housing in this jurisdiction.
